SERDI, LLC Joins TASC, Inc. Team on USG One IDIQ Contract

USG One

January 2012– SERDI, LLC was part of a winning team for the DISA's recently awarded USG One contract vehicle. SERDI, LLC partnered with TASC, Inc its bid for the USG One contract. "Our goal is to deliver sophisticated engineering and game-changing mission solutions that are efficient, smart and secure," says Richard Bowers, vice president of Mission Solutions at TASC. "We have assembled an expert team from a number of companies in order to have the right mix of technical expertise and mission experience to meet the government's complex engineering and technology needs." Under the USG ONE contract, TASC is one of nine companies that will be allowed to bid on individual task orders to deliver support services in areas such as systems engineering, information assurance, security, test and evaluation, enterprise architecture and program management. Eighteen companies have joined the TASC subcontractor team to deepen capabilities in the government's mission-critical areas.

About the USG One Contract

Services to be provided under this contract include program management, network operations, and network assurance. The winning contractor's are responsible for supporting day-to-day operations for managed services offering. The five-year ONE contract will provide a range of engineering and communications services to federal agencies.

About TASC, Inc.

Founded in 1966, TASC, Inc. is a leading, non-conflicted provider of advanced systems engineering, integration and decision-support services to the Intelligence Community, Department of Defense and civilian agencies of the federal government. A unit of Northrop Grumman Corporation from 2001 to 2009, TASC became an independent company in December 2009. With 5,000 employees in 38 locations, TASC generates more than \$1.6 billion in annual revenue.
